Brand

lockup

wyrmhoard

Mark left, wordmark right, gap about a third of the mark. The header uses md, the footer lg, small print sm.

wordmark

wyrmhoard

Jacquard 12, lowercase, cream on ink. Never in capitals, never outlined.

mark: wyrm around a d20

1-bit, 24 × 24 pixels. Integer sizes only: 24, 48, 96, 144 px. Never scaled in between.

one colour: yellow

wyrmhoard

For favicons, stamps and blocks where cream would be a second colour.

Colour

ink
#15120c

page background. Flat, never patterned.

surface
#1d1910

panels, inputs, status bar.
cream on it 12.8 : 1

yellow
#f5c518

active borders, primary buttons, prices, featured images.
on ink 11.5 : 1

yellow-dim
#6b5710

inactive borders, rules, faint engravings behind content.
on ink 2.7 : 1, never for text

cream
#e8dcb8

text, headings, tarot card faces.
on ink 13.7 : 1

cream-muted
#b0a060

secondary text, labels, frame titles.
on ink 7.2 : 1

no other hues (contrast ratios per WCAG)

Empty space is always flat ink: no grids, dots, patterns, gradients, glows, shadows, rounded corners or emoji. Blue is never used.

Type

headings: Jacquard 12

Wyrmhoard

Instruments for the long night

Seven-Fold Polyhedral Set

ABCDEFGHIJKLM abcdefghijklm
áäčďéíĺľňóôŕšťúýž 0123456789

Wordmark and h1 to h3 only, in cream. Sizes 36 / 48 / 72 / 120. Alternate: Jacquarda Bastarda 9. Covers Slovak diacritics.

everything else: VT323

Roll for initiative. 48

Roll for initiative. 36

Roll for initiative. 28

Roll for initiative. 22 body, labels, prices, stock

Roll for initiative. 20 frame titles

Pixel font, integer sizes, smoothing off, lowercase by default. Px437 IBM VGA 8X16 planned if licensed; VT323 for now.

Frames and rules

inactive

1px frame in yellow-dim. The label sits on the top border like a window title.

active

A yellow double line for the focused pane. The second line sits 2px inside, so nothing shifts.

panel

Surface fill for panels. Becomes active on hover or focus.

forbidden

- gradients, glows and shadows
- rounded corners; everything is square
- grids, dot fields and background patterns
- emoji and the colour blue
- text directly on an engraving, only ever on an ink panel

motion

- everything steps: steps(), never smooth curves
- opacity changes hop in 6 to 9 frames
- typewriter on the intro line, blinking block cursor
- animations switch off under the system "reduce motion" setting

voice

- dry, slightly self-aware tone
- the shop is the "hoard", the cart the "haul", categories "vaults"
- prices are written in "gold"
- footer line: "Guarded. Mostly."

Components: controls

buttons

Add to haul

on hover

Today's featured

on hover

Dither

ASCII

Fine

Primary, secondary and toggle. Square, colours invert on hover.

inputs

@ wyrm » search

email

» you@example.com

In stock only

Prompt line "@ … »" with a block cursor, a field with its label on the border, a checkbox.

confirm

remove Hooded Warden from your haul? [yn]

y yes, cast it out

n no, keep it

status bar

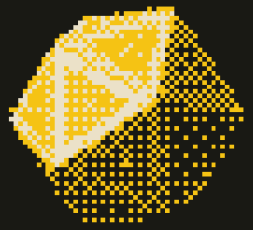

Lv:hoard haul:03 gold:91.50 Hr:Mars

The [yn] dialog always defaults to the safe choice. The status bar is stuck to the bottom of every page: place, item count, total in gold, planetary hour and time.

Components: card, header, bar

Dice

GF-0001 New

Ashen Spire d20

14 gold [########--]

Product card. On hover the picture changes: coarse dither, glyphs, fine print.

wyrmhoard dice books minis accessories @ wyrm » search haul items [3]

Header (desktop): logo, navigation, search line, item count in the haul.

Lv:hoard | haul:03 | gold:91.50 | Hr:Mars | T:16:09 free shipping over 60 gold

Status bar (desktop).

wyrmhoard [=] menu

@ wyrm » search

Header (mobile) with the [=] menu button.

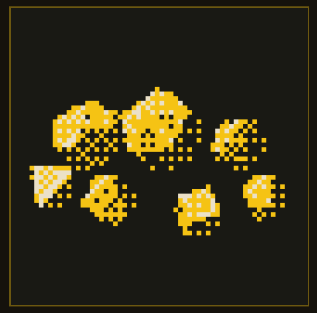

hoard haul:03 gold:91.50 Hr:Mars

home hoard search haul 03

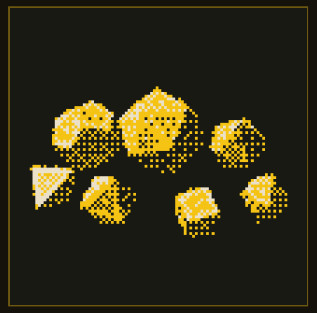

Bottom bar (mobile): home, hoard, search, haul.

Images: one bit

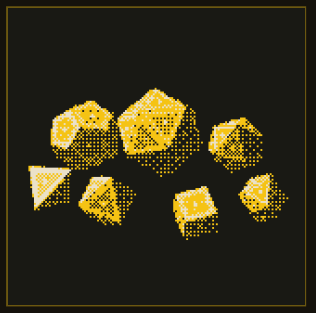

Every picture is error-diffused (Floyd-Steinberg or Atkinson) down to one bit: yellow pixels on ink, no mid-tones. The "level" is the cell size the image is diffused at before being scaled up without smoothing.

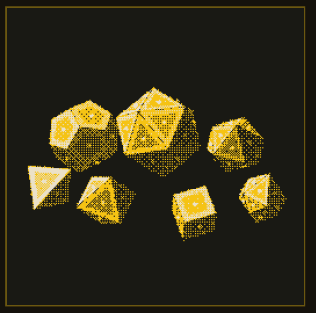

01 coarse, 20 px

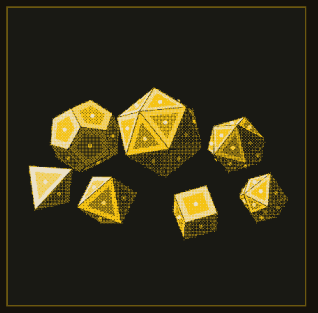

02 rough, 12 px

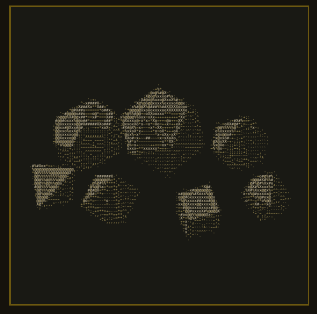

03 standard, 8 px

04 fine, 5 px

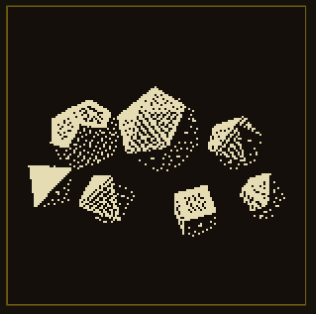

05 finest, 3 px

state: glyphs (ASCII)

state: fine, 1 px

tarot: cream on ink

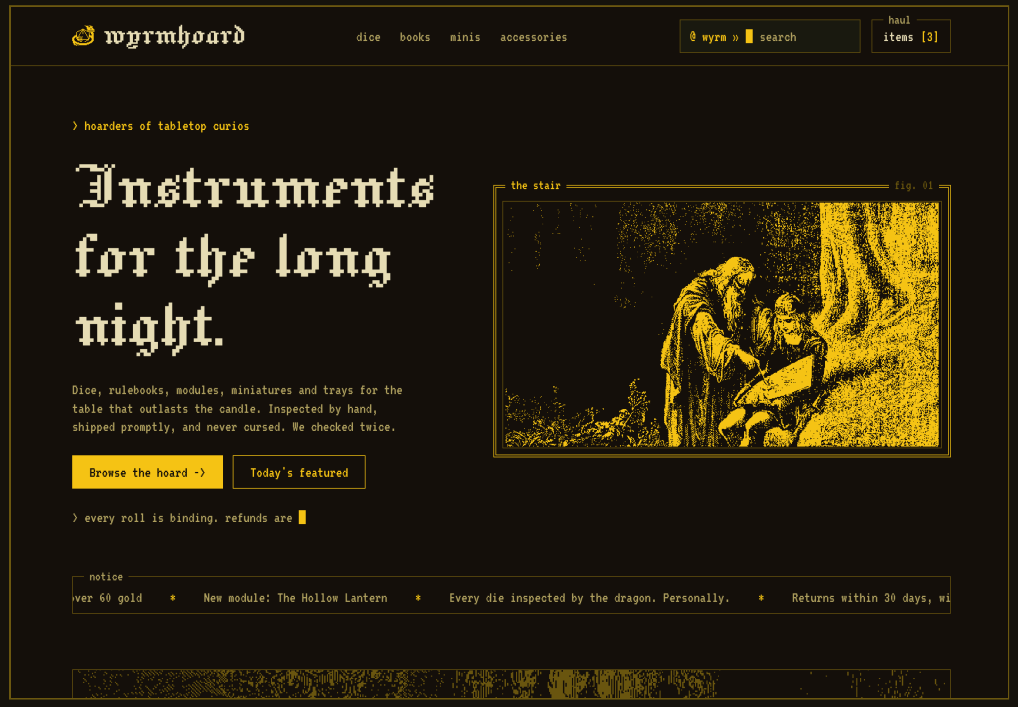

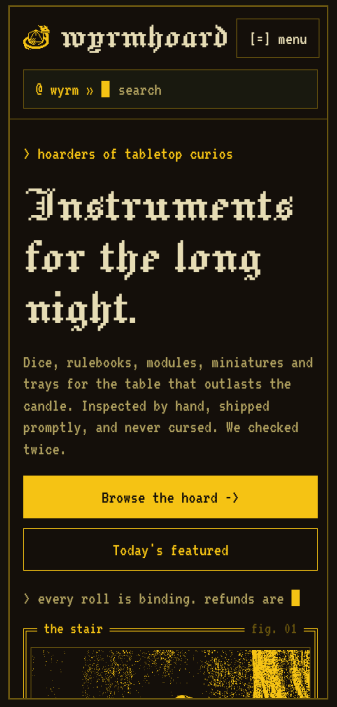

backdrops: yellow-dim, Gustave Doré engravings

On the product page the shopper can switch between three modes (dither, ASCII, fine), so it is clear what they are really buying. Text never sits directly on an engraving, only on an ink panel.

Responsive

Desktop, 1440 px: two columns, horizontal navigation.

Mobile, 390 px.

what changes on mobile

- navigation folds into a [=] menu button
- a bottom bar with the main destinations and status
- cards two per row; related cards scroll sideways
- filters hidden behind a [+] filters button
- sticky buy and checkout buttons above the bar
- touch targets of at least 48 px

The mobile version is a separate set of screens (390 px) and does not replace the desktop one. In the real site it will be one responsive set of components with a breakpoint around 768 px.

Sample page: catalog

Catalog, desktop: title over an engraving, filters left, card grid right.

Catalog, mobile.

Credits and AI use

inspiration

The visual language (1px frames with the label on the top border, the "@ … »" prompt line, [yn] dialogs, 1-bit engravings, the status bar) is inspired by the athanor project (GitHub: script-wizards/athanor).

Only screenshots of the project were used as reference; no code was taken. The palette (yellow and ink), the name, the logo, the copy and the shop components are original.

materials and licences

- engravings: Gustave Doré (1832–1883), public domain, converted to 1 bit
- Jacquard 12 a Jacquarda Bastarda 9: Soft Type Project, SIL Open Font License
- VT323: Peter Hull, SIL Open Font License
- logo and mark: original design, made with AI from my brief

AI use

This design was made with the help of AI (Claude by Anthropic, in Claude Design). The AI produced the desktop and mobile screens, the components, the logo and the copy from my briefs, and explained further practices (accessibility, filters).

The brief, the choice of references and images, the colour direction, the name Wyrmhoard, the vocabulary (hoard, haul, gold) and approval of every change were mine. This is design only: no shop code appears in this document.

A detailed record of AI use is in ai-journal.md in the project repository.
